EMERGENCY RESPONSE PLAN (ERP)

Managing emergencies involves interaction with a multitude of government agencies. Some are there to help you with a vast array of equipment, expertise, and funds.

Others are there to enforce laws and regulations on you. Regardless of their function and motivation you must be prepared to work with them. These agencies include local city, county, state and federal agencies, as well as a multitude of private nonprofit corporations. There is a wealth of assistance available to you, your employees, and your facility from these sources.

When an emergency occurs, your business will be interrupted. Therefore, it is essential to have appropriate plans and trained personal to overcome the situation in an effective and proper manner.

PNA has consultants available who have first hand experience planning for and responding to emergency. We are able to assist clients to identify and prevent possible threats and recovery systems / actions by developing onsite; and offsite; emergency management system. Our services include:

- *identification of possible threats and mitigation measures*
- *review and assessment of present mitigation and control measures*
- *develop corporate, onsite and offsite emergency response plans*
- *Communicate Emergency Response System to all staff those who may be not have specific duties under the plan but who may be affected during an emergency e.g. contractors and visitors.*
- *Review and update, which this takes into account changes in operations and organisation. Regular reviews should be conducted to ensure that contact numbers are up to date and that any lessons from exercises are incorporated.*
